GREEN CHOICE SERIES

**"LEED"ING
THE WAY...**

*Innovative & Inspired Food Stations
designed with sustainability in mind...*

Multiteria is committed to the importance of designing serving stations that utilize Leadership in Energy and Environmental Design (LEED®) compliant products. Our ESSENCE™ GREEN CHOICE SERIES will assist in contributing to your sustainable design goals and help your projects achieve LEED® credits in a variety of commercial applications.

ESSENCE™ GREEN CHOICE SERIES by Multiteria serving station features include:

- Core panel material (MDF board) manufactured from 100% recycled wood waste and meets the most stringent formaldehyde emission standards as well as a Class 1 Fire Rating.
- Laminate components are GREENGUARD® Indoor Air Quality Certified. All materials are free of formaldehyde and contain low- or no-Volatile Organic Compounds (VOCs).
- Countertops and tray slides; stainless steel or solid surface of recycled content material of cardboard and/or paper.
- All stainless steel is 100% recyclable.
- Adhesives and finishes are low-VOC emitting materials.
- Potential LEED® credits under: (MR = Material Resources; EQ=Indoor Environmental Quality)

REUSABLE FRAMES ENERGY-EFFICIENT COMPONENTS SUSTAINABLE SURFACES

Essence™

GREEN CHOICE SERIES

Countertops and Tray Slides: Stainless steel or solid surface of recycled content material

Food Shields utilize 3/8" tempered glass

Energy Efficient: 500-watt hot food wells

Optional counter top material from 100% recycled material.

Laminate Components are GREENGUARD® Air Quality Certified

Reusable welded tubular stainless steel frames allow for panel replacement when refurbishing is required.

Optional front and end panels from 100% recycled material.

EsSENCE™

GREEN CHOICE SERIES

Indoor Environmental Quality Low-Emitting Materials – The materials that comprise our ESSENCE™ GREEN CHOICE SERIES of counters can contribute to better indoor air quality. For example, Multiteria utilizes GREEN-GUARD® Certified laminates as low-emitting for formaldehyde, Volatile Organic Compounds (VOCs), as well as low-VOC adhesives. (LEED® credit support - 4.4)

Materials & Resources: Recycled Content – Our MDF Core Material is 100% recycled wood fiber/waste (LEED® credit support – 4.1, 4.2, 4.4, 7). Optional Countertop top material from 100% recycled cardboard or office paper. Class A fire rated.

Design for the Environment – Multiteria serving stations are designed for years of durability by utilizing an all-welded tubular stainless steel frame that can be recycled or reused. The front and end panels, countertops and food protectors are removable and replaceable when refurbishing is required.

Packaging Materials – Multiteria's serving stations are delivered blanket wrapped eliminating any on-site packaging waste.

Contributing to LEED® Standards Compliance – In some cases Multiteria's ESSENCE™ GREEN CHOICE SERIES contributes directly to LEED® points, and in some cases can assist in meeting the overall compliance with LEED® standards.

MULTITERIA: BEYOND THE STANDARD

Multiteria cares about the health and wellness of our future generations. We support the importance of Sustainability in order to contribute to minimizing the impact on our environment. We are committed to continue developing innovative products by listening and addressing the needs of our customers and of the ever-changing industry. **To learn more, call MULTITERIA at 630-585-1369.**
