

Screen Walls & Traffic Rails Brand Highlights

SCREEN WALLS & TRAFFIC RAILS

Define a “space” with decorative functional screen walls & traffic rails. Excellent solution for screening dish returns, trash sorting areas or other unsightly features in a food service environment. Also creates visual definition to define a space without having to tear down walls or incur costly construction.

Screen Walls:

- Screen wall consists of 16 gauge stainless steel tubing fully welded with brushed finished corners
- Insert panels with selected material (laminated/3 form) applied to front/back easily installed without use of tools for ease of future replacement/décor change
- Decorative functional design creates visual separation/blocks unsightly site lines
- Also available to be permanently fixed and anchored to building floors or modular sections if you want to move them

Traffic Rails:

- Excellent crowd control versus traditional retractable stretch gates. Much more stylish than traditional crowd control barriers on the market
- Defines space; functional piece of equipment available to be permanently fixed or movable sections
- Inset panels can be 3 Form/Laminated or your choice
- 16 gauge s/s panels with laminate applied to front/back easily installed without use of tools for ease of future replacement/décor change
